moving and sitting

MeinKreativStein

Playing, learning, moving and sitting

An idea by **Besonderes4Kids**

1. General
2. All advantages at a glance
3. Playing, learning and interaction
4. Important safety information
5. Sustainability and environmental protection

Besonderes4Kids is an innovative Start-up Company, compassionately dedicated to developing products for children.

MeinKreativStein was invented by the company owner while playing with his grandson and in the meantime has been successfully tested in German kindergartens.

MeinKreativStein is a high quality product, offering a multitude of playing and interaction possibilities.

MeinKreativStein is environmentally friendly, with careful utilization of resources produced in Germany and completely recyclable.

1. General

MeinKreativStein

– the all-rounder for (almost) all opportunities!

Congratulations on the purchase of

MeinKreativStein

MeinKreativStein encourages children to move, offers space for their fantasy and creativity and on top of that, it is lots of fun!

MeinKreativStein is an all-round versatile product for playing, learning and moving, suitable for all age groups.

In this brochure you will find many handy tips and ideas for the use of the KreativSteine.

Let yourself be inspired!

- clean with water
- CE-certified
- 100% recyclable
- 100% Made in Germany

CE certified

Recyclable

Made in Germany

Recommended by
kinderspiel + spielzeug

Balancing

3. Playing, learning and interaction

3.1 Balancing

Balancing is fun for children. They can test their abilities, train their sense of balance and concentration.

Use **MeinKreativStein** to build exciting balancing paths and obstacle courses in different levels of difficulty, depending on the age group.

The level of difficulty can be adjusted by the stacking height, distance between the modules or by the selection of the final module (MeinKreativStein = arched, MeinVerwandlungsStein = straight).

From a stack height of three modules, it is advised to use a drop protection.

Sportive activities

3.2 Sportive activities

Daily exercise is important! The KreativStein supports you with the implementation of movements offers in your facility and is ideal for small sport games like island hopping, obstacle courses or musical chairs.

While playing tag or running games, the KreativStein can serve as place for taking a time-out.

Stacking

3.3 Creative stacking

Building towers, shop counters, castles and walls... there are no limits for children. Also, small places of retreat, with the help of sheets and blankets or separations of different playing areas are quickly built.

Children are able to create self-made marble runs or build a water slide outside. Lots of fun for kids!

3.4 Learning and discovering

MeinKreativStein improves cognitive abilities of children, for example by getting to know colors, learning to count or arranging them by colors, amount or height.

Also, kids have lots of fun watching their self built dominos fall.

Variety of seating possibilities

3.5 Seating possibilities and storage

The KreativStein can be used as low tables and seats in kindergarten:

Two modules stacked can become a small stool, using an arched or straight piece as final module, depending on the preference of sitting. And the material will stay comfortably warm in winter as well.

(**MeinKreativStein** = arched,
MeinVerwandlungsStein = straight)

And the matching table is also assembled easily!

4. Important SAFETY INFORMATION

Use of **MeinKreativStein** and **MeinVerwandlungsStein**

Age recommendation: +1 year

Max. capacity: 180 kg

! To be used only under the direct supervision of an adult !

Caution: When standing, sitting, jumping, climbing or balancing on several modules, every single brick has to be flush, has to fit exactly and is mandatory to be piled up horizontally.

Caution: When standing, sitting, jumping, climbing or balancing on several modules, the MeinVerwandlungsStein always has to be the highest module. There cannot be another module on the MeinVerwandlungsStein.

Children are not allowed to stand, sit, jump, balance or climb on a stack higher than **three modules** (approx. 30 cm). There is a risk of falling down and getting hurt.

Not possible to be used in water or as a swimming aid.

Other warnings:

- Keep away from direct heat
- No contact to sources of ignition such as flames or sparks
- No changes of the product in any kind
- No impact on the brick with sharp objects, such as knives, scissors, saws, nails, screws, stones etc.

5. Sustainability and environmental protection

Climate neutral production and 100 % recyclable

Already during development, **Besonderes4Kids** opted for a versatile shape and 100 % recyclable material.

MeinKreativStein can be used long time, for all ages from +1 year.

Material: The KreativStein is made of 100 % recyclable EPP, is robust and durable.

Production: EPP is regarded as particularly sustainable due to its minimal resource use during production and processing. The KreativStein is climate neutrally manufactured in Germany.
